Question: Have asbestos and lead survey's been performed on this building? If so, please provide the results.

Answer: There are none.

Question: Please provide a cut sheet on the command center/dispatch wall that is hardened. What is used to harden the wall? Building 645 owners stated that the walls around control room have been modified and are bullet resistant. What materials were used to make them bullet resistant and are there Data Sheets available?

Answer: The Govovernment cannot locate a cut sheet showing the dispatch walls being hardened.

Question: Please provide data and cut sheets for the kitchen equipment?

Answer: The Governmentt is waiting on the Fire Dept to provide all of them and they will be forwarded immediately.

Question: Will the government furnish utility plans for this building?

Answer: Yes, see the attached.

Question: Will any of the associated work for this building be required to be performed during non-regular work hours?

Answer: No. This may be subject to change at a later date.

Question: Are all new walls to match existing conditions, run up to the acoustical ceiling, or run above the existing ceiling?

Answer: Match the new walls to the existing wall height. In the room where the floor is being demolished the ceiling is to stay at the original height.

Question: Can you clarify the additional items the customer has requested?

Answer: "Wish list" items requested by the customer at the walk through will not be entertained. The Government will adhere to the original SOW included in the RFP.
